Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a method of eliciting an immune response to HSP 70, classified in class 424, subclass 184.1.
- II. Claims 62-77 and 88-90, drawn to HSP 90 peptide complexes, classified in class 530, subclass 350.
- III. Claims 78-87, drawn to methods of purifying HSP complexes, classified in class 530, subclass 412.

The inventions are distinct, each from the other because of the following reasons:

Invention I, drawn to methods of eliciting an immune response to HSP 70 is distinct from complexes of HSP 90, since they are different molecules with different molecular weights and distinct structures.

Inventions II and III are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the HSP complexes can be synthesized on a column as claimed or alternatively can be recombinantly produced as a fusion protein.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their separate classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
